World Obesity Day 2020 will be held on 4th March 2020 and is a campaign platform of many of the world’s leading obesity organisations, including the European Association for the Study of Obesity (EASO).

It brings together healthcare, patient and political communities who are keen to raise awareness of obesity and the other diseases on which it impacts.

In Europe, the aim is to increase knowledge and understanding of the need for action at both European and national levels to improve prevention, treatment and care. At the same time, the campaign supports overweight and obese citizens in making the necessary lifestyle changes to manage their weight and improve their overall health and quality of life.
